

Greater Self Facilitates Transformational Process by Vibrations

*Breaking free the previous
limit. Opening a new doorway
for deeper and wider
exploration into Self, the
Energetic and Universe.*

A client said "It is not what you said or how you presented the information, but the energy present at the session mystically opened a new doorway. I now can access the (inner or energetic) area which I could not enter before."

Welcome to Age of Awakening Age of Self-Healing Age of Aquarius

It is my Greater Self working during a reading. My Greater Self loves all beings and dedicated **to serve the betterment of the Humanity, Earth and Universe**. Through vibrations, my Greater Self transmits the power, information and love from a client's Greater Self, Spirit Guides and the Universe. Greater Self also facilitates to anchor the Divine Power and Love into the client's body and heart.

The goal of the reading is "**Empowerment**". In time a client will become able to receive all the information, guidance, power and love from within, without depending on the exterior sources. In time a client will also become able to heal himself/herself. These will become possible as a client becomes **to live in a direct communion with the Source (with ATMAN SELF, Higher Self)**

About Kimie 後藤王重

October, 1995 – **The Great Light** descended in Woodside forest in California and my ego consciousness merged with It for a brief moment. It is like a .. miracle .. My life's focus shifted from living for the personal ambition (to become CEO, rich and successful) to fulfilling Soul's desire to serve **the Betterment of the Universe.**

I was born and raised in Japan. I was not aware of my spiritual calling and gifts until age 36. Looking back, I was a sensitive being before and after birth, taken to the training at the energetic especially at night.

My soul heritage belongs to the star gazers like Anasazi and Essene people. Since the ecstatic merging with the Great Light, I have been going through the intense spiritual-psychic training and transformations. The training is about **'tuning'** – how I tune into and discriminate the deep and wide energies in the Universe and the energetic dimensions.
